

Cy5

Cat #:BMD0051

Size: 5mg/50mg

Cy5 is a red near infrared fluorescent dye.

Product Information

Product name Cy5

Specification

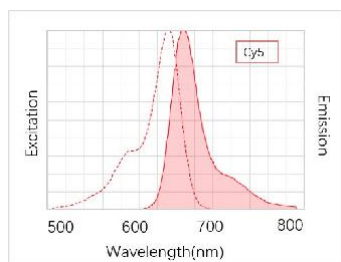

Fig. Cy5 is a red near infrared fluorescent dye, which has low background, high fluorescence intensity and good stability.

Product Properties

Storage instructions

Store at -20°C, protected from moisture and light. Product is stable for at least 12 months from date of receipt if stored as recommended.

Shipping

Gel pack with blue ice.

Precautions

The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.

Additional Information

Background

Cyanine dye Cy5 is a red near infrared fluorescent dye, which has low background, high fluorescence intensity and good stability. Cy5 is often used in biomolecular markers, fluorescence imaging and other fluorescent bioanalysis, such as labeling of polypeptide, protein and nucleic acid. When combined with protein, the fluorescence intensity was significantly enhanced.
